

## Portable Power station SP 1000 / SP2000

SP1000

SP2000

Large - capacity charging station

1.5 - hour fast charging

Simple and easy to use

Supports PV input for charging at any time

High - power AC output

More than ten protection functions for higher safety

### SP1000 / SP2000 Product Introduction

| SP 1000                     |                               |                  |                                 |                   |                     |
|-----------------------------|-------------------------------|------------------|---------------------------------|-------------------|---------------------|
| <b>Output Specification</b> |                               |                  |                                 |                   |                     |
| AC Outlet×2                 | 110V 60Hz or 220V 50Hz, 1000W |                  |                                 |                   |                     |
| Peak Power                  | 2000W                         | USB - A×3        | QC3.0, 5 - 12V, Max. 18W        | Car Outlet×1      | 11 - 14V / Max. 10A |
| DC Outlet×2                 | 12V 5A                        | Type - C×1       | PD3.0, 5 - 20V, Max. 100W       | Wireless Charging | 15W                 |
| <b>Input Specification</b>  |                               |                  |                                 |                   |                     |
| DC Input×2                  | 12V 10A                       | Battery Capacity | 1058Wh                          | Radio             | 87.5 - 108MHz       |
| Type - C Port×1             | 5 - 20V; Max. 100W            | Battery Type     | LiFePO4                         | Spotlight         | 2W                  |
| Charging Time               | 9h                            | Cycle Life       | >2000 cycles to 80% capacity    |                   |                     |
| <b>General</b>              |                               |                  |                                 |                   |                     |
| Weight                      | 14KG                          | Package Weight   | 16.2KG                          |                   |                     |
| Dimension                   | 330x260x230mm                 |                  | Package Dimension 440x320x290mm |                   |                     |

| SP 2000                     |                               |           |                            |  |                                 |
|-----------------------------|-------------------------------|-----------|----------------------------|--|---------------------------------|
| <b>Output Specification</b> |                               |           | <b>Input Specification</b> |  |                                 |
| AC Outletx3                 | 110V 60Hz or 220V 50Hz, 2400W |           | AC Inputx1                 | 1500W, full charge time≈1.5h           |                                 |
| Peak Power                  | 4000W                         |           |                            | 800W, full charge time≈2.5h            |                                 |
| DC Outletx2                 | 12V/ Max. 8A                  |           | DC Inputx1                 | 12V/ 24V, MAX. 8A                      |                                 |
| USB - Ax3                   | QC3.0, 3.7 - 20V, Max. 24W    |           | Solar Input                | 15 - 100V,                             |                                 |
| Type - Cx3                  | PD3.0, 5 - 20V, Max. 65W      |           |                            | Max. 400W (Interface Type: XT60EW - M) |                                 |
| Car Outletx1                | 12.6V±1V, Max. 8A             |           | Type - C Portx3            | 5 - 20V; Max. 100W                     |                                 |
| <b>Battery</b>              |                               |           | <b>General</b>             |  |                                 |
| Battery Capacity            | 2016Wh                        | Weight    | 29.5KG                     | Package Weight                         | 31KG                            |
| Battery Type                | LiFePO4                       | Dimension | 420x331x270mm              |  | Package Dimension 550x440x330mm |
| Cycle Life                  | >2000 cycles to 80% capacity  |           |                            |  |                                 |
